**Course Description:**

This course is intended to be a general introduction to both the substance and methods of western philosophy. Ideally, students should exit this course with both a sense of what sorts of things philosophers spend their time thinking about and an appreciation of how they go about that thought. Because of the breadth and depth of philosophical inquiry (both in regards to its subject matter and its history), we cannot possibly hope to cover everything worthy of investigation, even in a summary and superficial fashion. What we can hope to do however - and what we will do in this course - is cover some particular topics of interest that have been a persistent feature of philosophical discourse throughout the last 2500 years.

**Course Goals:**

The expectation is that students will leave this course with an understanding of and appreciation for philosophical study. Ideally, students will recognize that the methods of inquiry employed in philosophy have application in every area of life, and will leave the course prepared for more active, critical, and reflective approach when assessing the merits of their own beliefs and the beliefs of others.

**Required Text:**

(IP) 2013. *Introduction to Philosophy: Classical and Contemporary Readings*. Seventh Edition. Edited by John Perry, Michael Bratman, and John Fischer. New York: Oxford University Press.

**Required course materials**

No course materials are required beyond the required texts. Any material not in the course

textbook will be made available on the course website.

### Grading Policy:

Grading will be determined by a combination of class attendance and participation, a course response paper, quizzes, and the results of your exams.

Participation	20
Quizzes (Cumulative)	50
Final Exam	15
Response Paper (due at the end of week 4)	15

### Grading Scale:

A	90-100	C+	72-74
