The course will concentrate on those principles that are common to major common law jurisdictions such as the United States, Australia and England. This course introduces fundamental law topics, such as contracts, ethics, as well as regulation of environmental issues. Awareness of basic legal principles is one of the best risk management tools for any businessperson. This course will help you examine the ways in which society functions and the potential effects of the legal system on businesses.

Upon successful completion of this course, students will: (1) Recognize types of contracts, including formation and modification of contracts; (2) Identify the concepts behind warranties and remedies; (3) Explain how law can be used strategically as a toll to reduce or manage business risk; (4) Analyze transactions as well as the process of contracting.

Required course materials:

There are supplemental materials and cases. From time to time, Professor Lu will supplement the textbook with online materials. It is absolutely essential that you read <u>all</u> of the assigned textual material and think about how each chapter's material connects to the other material covered in the course. There is no substitute for preparation!

Grading Policy:

Grades will be determined as follows: **25 percent for the midterm exam**, which will be held on Thursday of the third week; and **50 percent for the final exam**, which will be held on Friday of the final week. Professor Lu also reserves **25 percent** of the total grade for purposes of incorporating **quality of participation** into the determination of each student's grade in the course. Our classroom sessions are designed to be **highly interactive**, with a large component of direct participation and active discussion from every student.
