Course Description:

This course focuses on the fundamental concepts and analysis of microeconomics, including supply and demand, the price mechanism, costs and revenues, theories of the firm, market structures, factor markets, market failure and the impact of government in promoting economic efficiency. The course examines economic decision-making by individuals and firms and encourages students to apply microeconomic tools to current economic policy problems and issues such as pollution, rent controls, farm subsidies and welfare policies.

Course Goals:

A student who satisfactorily completes this course should:

1. Understand the basic terms and concepts of microeconomics.
2. Understand and be able to apply the economic model of consumer maximization.
3. Understand and be able to apply the concepts of cost minimization and profit maximization.
4. Understand the basic implications of different market structures: competition, monopoly, and oligopoly.

Required Textbook:

“Principles of Economics”, by Gregory Mankiw, Seventh Edition, 2015 Cengage Learning.

Note: Other editions may be OK, but please check with me first as the lecture slides are based on the seventh edition of the text book.
