ACFI 350 Introduction to Managerial Accounting

Professor: TBA
Email: TBA
Semester: July 11 – August 5, 2022 Summer
Location: Online

COURSE DESCRIPTION:

Course Overview: A study of management's use of accounting information to make decisions related to planning, controlling, and evaluating the organization's operations. The behavior and management of costs, as well as techniques used to evaluate and control results of operations are discussed. Topics include: cost terminology, cost behavior, cost- volume-profit analysis, job order costing, activity based costing, segment reporting, budgeting, standards, performance measures and variance analysis, evaluation of decentralized operations, and differential analysis techniques. This course is presented from the perspective of the *user* of accounting information rather than the *preparer* of such information.

Analytical problems solving techniques, including data analytics and the use of spreadsheets will be utilized as decision- making tools.

EXCEL PROJECTS:

Two Excel application projects will be passed out in class. The first project focuses on Segmented Income Statement applications and the second one involves a Master Budget. Additional information will be presented during class.

EXAMINATION POLICY:

No “make ups” of missed examinations are allowed. If you miss an exam for a justifiable reason, the more difficult, cumulative final examination grade will count in place of the missed exam.

- Attendance is an integral part of this course. Some material for which you will be responsible is not included in the text.
- Students may use basic calculators during exams (programmable and graphic calculators and cell phones are not allowed).

Course Objectives and Outcomes:

Objectives	Outcomes
1. To familiarize students with managerial accounting concepts and techniques.	Students will be assessed on two examinations involving managerial accounting.
2. To ensure that students can utilize analytical decision-making tools.	Students will be required to master a number of analytical techniques through graded projects and examinations.
3. To familiarize students with available technologies to assist in financial decision making.	Students will be assessed on graded assignments and projects requiring the use of electronic spreadsheets.
