International Summer School**

STAT 220 Introduction to Statistics

Term: October 10th–December 2nd, 2022

Instructor: Shen Fan

Home Institution: China University of Petroleum

Email: fans@cup.edu.cn

Class Hours: 240–360 minutes each week (2,400 minutes in total)

Office Hours: TBD

Discussion Session: 60–120 minutes each week

Total Contact Hours: 64 contact hours (45 minutes each, 48 hours in total)

Location: WEB

Credit: 4 units

Course Description:

Statistics is the study of data and how it can be collected, organized, analyzed and interpreted to obtain insights. Descriptive statistics focuses on organizing and summarizing data so that it is better understood. Inferential statistics leverages data from a small group to arrive at conclusions about the entire population of which the small group is a part. Statistics is part of everyday life. One of the most sought-after job areas these days is business analytics, which refers to the application of statistics to obtain important insights from data available to organizations. This course provides a calculus-based introduction to statistics.

Course Goals:

We will first introduce data and statistics, data presentations, measures of centrality and variation, discrete and continuous probability, hypothesis testing for populations and parameters, Chi-square tests, analysis of variance.

Prerequisites:

At least one semester of calculus is required; two or three semesters are strongly recommended.

Required Textbook:

De Veaux, Velleman and Bock, Stats: Data and Models, Pearson, ISBN 13: 978-1-292-10163-7

Grading Policy:

Grading will be determined by homework and the results of your exams. Homework 30%, Midterm Exams 30%, Final Exam 40%.

Grading Scale:

Assignments and examinations will be graded according to the following grade scale:

A	90-100	C+	72-74
A-	85-89	C	68-71
B+	82-84	C-	64-67
B	78-81	D	60-63
B-	75-77	F	below 60

Course Schedule:

Oct.10

What are Statistics? Displaying and Describing Categorical Data

Oct.11

Quantitative Data, Distributions

Oct.12

Standard Deviation, Scatterplots

Oct.17

Linear Regression, Regression Wisdom

Oct.18

Re-expressing data, Randomness

Oct.24

Sample Surveys, Experiments and Observational Studies

Oct.25

Review first 12 chapters and First tests

Oct.26

Probability, Probability Rules

Oct.31

Random Variables

Nov.1

Probability models

Nov.7

Sampling Distribution Models

Nov.8

Confidence Intervals, Testing Hypotheses

Nov.9

Inference about Means, Tests and intervals

Nov.14

Comparing Groups

Nov.15

Paired Samples and Blocks, Comparing counts

Nov.21

Inferences for Regression

Nov.22

Analysis of variance

Nov.23

Multifactor Analysis of Variance

Nov.28

Multiple Regression

Dec. 2

Final Exam
