

University of International Business and Economics International Fall Session

PSY 110 Introduction to Psychology

Term: October 10th–December 2nd, 2022

Instructor: Dr. Caroline Stanley

Home Institution: Bridgewater State University

Email: cstanley@bridgew.edu

Class Hours: 240–360 minutes each week (2,400 minutes in total)

Office Hours: TBD

Discussion session: 60–120 minutes each week

Total Contact Hours: 64 contact hours (45 minutes each, 48 hours in total)

Location: WEB

Credit: 4 units

Course Description:

Psychology entails the scientific study of behavior, broadly defined. As we shall quickly see, how we understand and study behavior often depends on the theoretical framework used. Hence, a key goal of this course is to guide students toward a broad and critical understanding of psychology from a number of different perspectives. We will accomplish this by exploring, evaluating, and discussing various strengths and weaknesses of different perspectives for understanding behavior based on the theoretical and empirical literature. Films may be used to help reinforce ideas and issues presented in the lectures and in the readings. This is a web-based course. Students are expected to watch all lecture videos (30-40 hours in total) and participate in 4 online live sessions (2-hours each, 8 hours in total) on zoom.

Course Goals:

A student who satisfactorily completes this course should:

Successful performance in this class will include learning about psychology at four levels.

First, you will need to learn the language of psychology, the definitions and uses of technical terms. Second, you will need to understand how individual ideas are combined into concepts and theories. Third, you will learn how psychologists gather information to develop and test their theories. Fourth, you will learn that not all psychologists agree on important psychological problems and you will begin to critically explore, compare, and evaluate diverse perspectives.

ISBN-13: 978-1-319-23743-1

ISBN-10: 1-319-239743-6

Grading Policy:

UIBE awards grades of A, A-, B+, B, B-, C+, C, C-, D, and F. Most colleges and universities do not award transfer credit for grades of D or F.

In this course, grading will be based on the following:

EXAMS: There will be two exams. Each of the exams will contain 75 multiple-choice questions (2 points each). In general, exams will not be comprehensive. Each exam will only cover the lectures and readings for that range of dates. Approximately 60%-70% of each exam will be based on information presented in class, including any films watched, the remainder will be based on assigned chapters from the textbook (even if the textbook material is not discussed in lecture). All of the exams are required. If you miss an exam, then you should try to contact me immediately. A specific exam time for all students will be announced approximately one week in advance.

ASSIGNMENTS: There will be five writing assignments during the term. These assignments may include essays or will include a list of terms that you are to define and submit to the TA. You may use your book to assist you in writing your response. Each written assignment will be worth a maximum of 10 points, for a total of 50 points for all 5 assignments. If you do not provide your response to the assignment as instructed and on time, you will receive zero points.

FINAL COURSE GRADES: Your final grade is based on the total number of points you earn on each of the two exams (total possible exam points = 300) and five in-class assignments (total possible points = 50).

The following grading scale will be applied:

| | | | |
|----|--------|----|----------|
| A | 90-100 | C+ | 72-74 |
| A- | 85-89 | C | 68-71 |
| B+ | 82-84 | C- | 64-67 |
| B | 78-81 | D | 60-63 |
| B- | 75-77 | F | below 60 |

Class Rules:

- Prerecorded lectures by topic will be provided one week in advance to support your reading of the textbook. Please use the full 2 hours for each class to review the lecture materials carefully until you understand all of the concepts. It is expected that students will follow the topic schedule indicated in the syllabus to review all lectures to be covered during each week to ensure that they are prepared for scheduled exams. Because the lectures vary in length based on the different topics, it is recommended that students try to review the lectures in advance to ensure that they are keeping up with the topics and are best prepared for the mid-term exam and final exam. If you have additional time, then you should always use that time to review past lectures and make full use of the 2 hours allocated per class day.

- Academic dishonesty is not tolerated. Students caught cheating will receive an F for that test and will be in jeopardy of failing the course.
- Students should expect to spend two hours outside of each class session; readings in the textbook must be completed prior to the corresponding class meeting.
- NO MAKE-UP TESTS OR EXAMS WILL BE GIVEN. Exams will be timed (50 minutes) and will not be open book.
- It is DANGEROUS to drive a vehicle while attending a zoom meeting because attention is divided when people attempt to multitask. In turn, this means that you are less focused on your driving and your reactions (i.e., slamming on the breaks, swerving to avoid a collision) become delayed. For safety reasons, students are prohibited from attending meetings in any form if they plan on driving at the same time. Students who drive during class or engage in other unsafe behaviors will be asked to leave immediately (Remember: Your safety is more important than this class!)

Course Schedule:

The planned schedule (see page 4) may be modified to suit the interests or abilities of the enrolled students or to take advantage of special opportunities or events that may arise during the term. The sequence of classes is organized based on a sequence of topics across days, rather than based on a schedule of specific days. However, please note the specific dates and times for in-class meetings, assignment due dates, and exams. That means that all lectures and readings should be completed before these special days.

Academic Honesty:

1. Please be respectful to your instructor and classmates. We live in a global community and it is useful to appreciate and value the diversity of views around us.
2. Don't cheat! Cheating on an exam will result in a failing grade for the exam, and possibly a failing grade for the course. Do not plagiarize (i.e., take credit for another person's writing or work). Please make sure that you attribute words or ideas to appropriate sources by citing them in your paper. Anyone producing a paper found to include plagiarized content will receive a zero for the paper, as well as an immediate failing grade for the course.
3. You should seek help from me as soon as you begin having difficulty with the course. If your first test grade is not as good as you wanted or expected, make an appointment with me immediately, or see me during office hours. Don't wait until the end of the semester to ask for help –do it early.
4. Note, some of the materials presented in class (e.g., in films shown in class) may involve images of a mature nature. If you think this may be a problem for you, you must inform me immediately.
5. The contents of this syllabus should be viewed as a working plan for the semester. Unforeseen circumstances during the term may necessitate some changes in this syllabus. Changes will be announced in class, and it is your responsibility to take note of them by regularly attending.

| Unit | Day | Date | Topic | Activity |
|------|------|---------|--|---|
| A | M | Oct. 10 | Welcome! Overview of Course | Read syllabus |
| | T | Oct. 11 | What is Psychology? (ch. 1) | |
| | W | Oct. 12 | Major Paradigms (ch. 1) | |
